

ENVIRONMENTAL POLICY

In the day-to-day running of its holiday complex business, the CESGARDEN S.L group endeavours to reconcile the company's economic growth with concern for the environment within a context of sustainable development, in order to ensure the existence of a prosperous and flourishing planet for future generations.

With this aim in mind we are set to introduce a series of continuous and progressive improvements to our business in order to prevent or reduce our impact on the environment, particularly in those activities that involve an unreasonable use of natural resources and energy, or that lead to the deterioration of water, air and land quality and the destruction of the surrounding natural ecosystems.

The management of CESGARDEN S.L undertakes to:

1. Become directly and fully involved in environmental management at all levels.
2. Guarantee the fulfilment of all requirements set out in the applicable environmental legislation and other requirements subscribed to by the group.
3. Monitor and periodically update this Environmental Policy in keeping with our commitment to continuous improvement.
4. Review the environmental practices of our suppliers and contractors and encourage them to progressively apply environmental criteria, particularly with regard to the purchase of environmentally friendly materials and products.
5. Control and make rational use of natural resources, especially energy and water.
6. Implement the necessary measures needed to prevent or reduce emissions into the atmosphere, water and land and to reduce waste generation.
7. Protect the natural assets of the surrounding area.
8. Conduct further investigation into new technologies in order to incorporate into our system all those economically viable options which may contribute towards lightening our environmental impact and ensuring a continuous improvement in our environmental record.
9. Involve all staff in environmental management, contribute to their knowledge on the environment through training and the day-to-day use of the tools of our environmental management system
10. Inform our clients about our principles of environmental conduct and provide them with information about nature trails in the area.

In order to ensure that we achieve these objectives and goals, CESGARDEN S.L will assign all the necessary human and material resources to the endeavour through the implementation and maintenance of our System of Environmental Management.

In order to enhance our communication with the community of CESGARDEN S.L will make its environmental declaration available to the public.

Cala Ratjada, 10th October 2008
